This 1 day workshop will be of interest to anyone looking for an introduction to Lean Thinking or for raising their awareness of its potential.

Workshop Outline

AM:

- The Principles of Lean Thinking,
- understanding customer value,
- Introduction to key tools such as visual management, 5S.
- Recognise waste in processes and value streams.

PM:

Take part in a fun interactive simulation to practise hands on the principles and tools covered earlier in the day and see how they can lead to significant performance improvement.

About Us

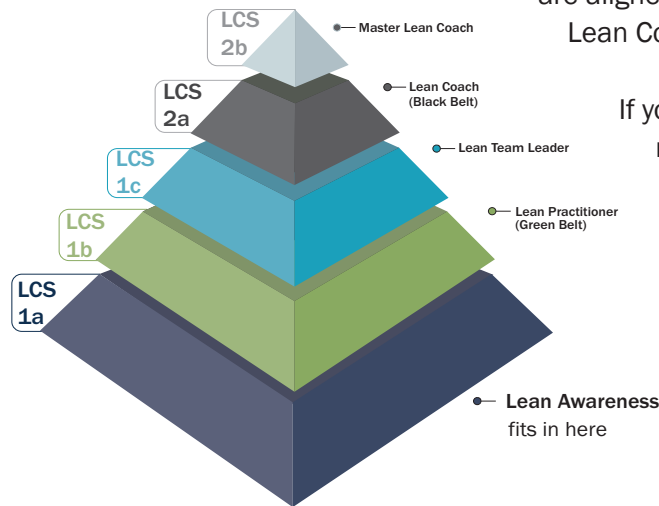

S A Partners are Leading specialist providers of Lean Consulting and Training Services founded by Professor Peter Hines (co-founder of the Cardiff University Lean Enterprise Research Centre) in 1996.

We have acquired a wide range of learning materials, case studies and examples drawn from over 20 years experience of Lean implementation in a diverse range of organisations big and small. Our trainers will incorporate materials which are relevant to the delegates attending .

Certified Training

This is the first in a series of accredited training programmes we offer that are aligned with Cardiff University's Lean Competency System.

If you successfully complete a multiple choice questionnaire at the end of the workshop you will receive a certificate awarded by the University.

“What previous delegates have said about this workshop”

- “A well run and enjoyable experience”
- “Very well paced and engaging delivery style”
- “This was my first formal introduction to Lean and it was excellent. The practical simulation was a great fun learning experience”
